DIVISION 12 - FURNISHINGS

DESIGN CRITERIA
Stationary workstations in the office/laboratory setting should provide adequate surfaces for ergonomic arrangement of the computer keyboard/pointing device, monitor and document/work holders. Follow good ergonomic principles providing height adjustable work surfaces, openings adequate for leg and knee clearances and sufficient overhead space to allow adjustments to vertical equipment placement. In particular, care shall be given when designing fixed workstations for public contract work activities, such as cashiering, customer service counter and pharmacy. These workstations shall be less than 30 inches wide and adjustable for either seated or standing work. The BSR/HFES100 Draft Standard for Trial Use, “Human Factors Engineering of Computer Workstations” or ANSI/HFS100-1988 “American National Standard for Human Factors Engineering of Visual Display Terminal Workstations” shall be reviewed by the Design Professional.

WINDOW TREATMENTS

Provide white or off-white 1” wide horizontal blinds for all exterior windows.

SITE FURNISHINGS

BICYCLE RACKS
Lightning Bolt LR Series by Creative Pipe, Inc. or equal.

1. Materials
   a. Carbon Steel
      (1) Pipe: ASTM A 53, Schedule 40 or Schedule 10.
      (2) Round Bar and Flat Bar: ASTM A36.

2. Fabrication
   a. Rack: 2-inch by 2-inch, 0.188-inch wall, structural and mechanical square steel tubing.
   b. Loops: ¾-inch solid round bar.
   d. Finish: Hot-dipped galvanized.

3. Style
   a. Vary to suit site conditions: single sided, perpendicular; single sided, diagonal; double sided, perpendicular.

BENCHES
TRASH AND LITTER RECEPTORS
Strategically design for trash and recycling systems throughout the interior and exterior of the building. Include in the design how each space will be supported from an office to the office suite, floor, assembly areas, lobby, entrances, approach, outdoor gathering space, etc. Review the design and planned operations with the building occupants. Delineate the trash/recycling receptors that will be included in the project and those to be provided by the occupants.

Exterior Receptors
Provide outdoor trash and recycling bin sets at building entrances, resting areas, patio areas, eating areas and walkways.

Concrete walkways and building entrances:
1. Trash bin is Quick Crete Products, model number QS-PS2532W-N-UCDAVIS.
2. Recycling bin is Quick Crete Products, model number QS-PS2532W-M-UCDAVIS.

1. Trash bin is CF 4510 – 45 gallon flat top barrel, no lid with DA 1855 – steel dome top for 55 gallon barrel, C 3555 – rigid plaster liner, CS 3600 - post with signs and brackets.
2. Mixed paper bin is CS 3035 – barrel with mixed paper labeled lid, C 3520 – rigid plastic liner with CS 3110 – side access door.
3. Cans and bottles bin is CS 3035 – barrel with cans and bottles labeled lid with C 3520 – rigid plaster liner and CS 3110 – side access door.

Interior Receptors
Provide built-in indoor recycling cabinets where appropriate for building design. Recycling cabinets are multi-purpose receptacles for cardboard, mixed paper, bottles and cans, and trash. Place recycling cabinets in convenient access areas and high traffic areas such as lobbies, anterooms to lecture halls, and main corridors.

Small Cabinet
Locate the small cabinet in lower traffic areas such as break or mail rooms. There are three compartments designated for mixed paper, bottles and cans, and trash and one open area for cardboard collection. Place one bin (11” wide x 20” deep x 30” high) in each labeled compartment. (See Diagram 1 in Drawings Section of CSDG.)

Minimum Clearances
1. Cabinet dimensions 65” wide x 28” deep x 36” high.
2. Cabinet door 14” wide.
3. Inside cabinet 34” high.
Large Cabinet
Locate the large cabinet in high traffic areas such as lobbies and anterooms to lecture halls. This design includes a 10 cubic feet addition for newspaper distribution and storage. There are three compartments designated for mixed paper, bottles and cans, and trash and one open area for cardboard collection. Place one bin (14" wide x 14" deep x 28" high) in each labeled compartment. (See Diagram 2 in Drawings Section of CSDG.)

Minimum Clearances
1. Cabinet dimensions 90" wide x 25" deep x 36" high.
2. Cabinet door 16" wide.
3. Inside cabinet 34" high.

Details
Cabinet doors open to floor level so bins can slide into the cabinet. Toe kick is built into swinging cabinet door, which aids in keeping bin in place. (See Diagram 3 in Drawings Section of CSDG.)

Proper signage is required to avoid contamination. Use 5" wide x 2" high laminate plaques to label cardboard, mixed paper, bottles and cans, and trash. (See Diagram 4 in Drawings Section of CSDG.)
